A Gem.

An orator out West (by the way, all the lofty bursts of eloquence come from "out West now-a-days,) in commonting on the " dangerous character of circumstantial evidence," is said to have closed with the following gorgeous percention. Shade of Cicero, hide your diminished head !-

"If circumstantial evidence were personified, it should be the form of a beautiful woman. Her brow should be the brow of Minerva; her smile the smile of Venus; her voice the voice of a Syren. She should be cisd in the white robes of innocence, but on her garments should be seen "clouts of blood." Her step should be the conqueror's desolution; and in the back ground, Birde John haunting her footsteps, should appear the Buttle John shades of unquiet, perturbed spirits, ranged in groups of twelve representing the jurors who had been led astray by her knowing brow, her treacherous smile, and yet more seductive voice."

Homopathy.

Here is a homopathic dose of an argument for Homenpathy. Though but a drop in size, it is highly concentrated, and may have a powerful effect on some minds :

"A strong, healthy, country female was stung in the arm by a wasp. CLERGY AND JOCKEY -A clergyman who was in the habit of preaching in different parts of the country, was not long nce at an inn, where he observed a horse ickey trying to take in a simple mac. 'v imposing upon him a broken-worded torse for a sound one. The parson knew the bad character of the jockey, and taking the bad confected of the pockey, and taking the state of the gentleman aside, told him to be cautimus of the person was dealing with. The general debugs E semand debugs E seman and the jackey quite nettled, observed : "Parson, I had much rather hear you preach stand bard same same l than see you privately interfere in bargains | Sounds France than see you privately interfere in bargains | Walter Samuel | Well," replied the parson, "if you had S mday, you might have heard me preach." John Houghton, Treasurer, DR. ery man knows whether the article he offers is was that P' inquired the jockey.

Evenuesive -At a fire in Detroit, lately, no little merriment was created by the seclamation of a tall, spare German, with a night cap and green goggles on. He had emoved all his goods from his store, many of which were broken though his house escaped the firmes. Surveying the wreck of some of his crockery ware, he exshimed, "Dish is too pad; cb'ry ting Feb 7, from J P Ross for J W Shriner '48 10,00 proke, and hoting purnt !"

Florace Greely calls juvenile tobacco chewers, "young conkeys who are just learning to brutify themselves by the use of the vile weed." He speaks from experience, for he says when he was six years old he smoked nearly an inch of e gar himself. He winds up by the remark, "I do not say that every smoker and chewer is necessarily a blackguard, but there is a very steep preclivity that way."

Unlike young S. P. Townson's, it improves with a said never changes but for the bitter; because it is pictured on scientific principles by a scientific main. The highest provided of the minute, and the latest discoveries of the art, have all here brought into requisition in the manufecture of the Grif Dre Sarasparitie. The Sarasparitie rule is travel known to medical men, contains many insidered properties, and some properties which are some or unexpendence, which is frequently in for use, and duce fermentation and send, which is injurious to the extent. Some of the properties of Sarasparities are selected, where the properties is the preparation, if they are not preserved by a referred to the preparation, if they are not preserved by a referred to the preparation, if they are not preserved by a referred to the preparation, but they exist the properties of the root, which they do it is ready as a part to the properties of the root, which give not it is rained and the coloring manufacture. As S. P. But what else should be expected from one who knows nothing comparatively of medicine or disease? It requires a person of some experience to cook and serve up even a commod decent meal. How much more important is a fast the possens who manufactures real-cline designed for WEAK STOMACHS AND ENFILEBLED SYSTEMS, should know well the medical properties of plants, the less manner of securing and concentrating their healing writes, also an extensive knowledge of the stricture disease which affect the human system, and how to adapt remedies in these diseases?

It is to arrest frauds open the differentiate, to poor balls into wounded humanity, to kindle hope in the despatring beson, to gestore health, and bloom, and vigor into the crushed and broken, and to banish infirmity that OLD DR.
